

PHOTOELECTRIC SMOKE ALARM

Photoelectric Smoke Alarm work using a photoelectric sensor and a light source. As smoke enters the chamber and crosses the path of the light beam light is scattered by the smoke particles aiming it towards the sensor, which in turn triggers the alarm.

Features

- Optical smoke sensing technology.
- Field-replaceable smoke chamber.
- Detector head & terminal base design.
- Low-profile design blends into ceiling.
- Advanced data analysis reduces chance of nuisance alarms.

Technical Specification

- 24 VDC(nominal).
- Operating Environment-Temperature:32 to 120 degree F(0 to 49 degree C).
- Storage Temperature: -4 to 140 degreeF.
- Shipping Weight:0.44lb(164 g).
